-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 14 September 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

***Election/Restrictions***

Applicant's election of Species X in the reply filed on 09/14/07 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5, 7-9, 14, 17 and 20-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Allen et al US Patent 5,653,767.

Allen et al discloses a prosthetic foot (10) having a posterior (14) and anterior (28) plantar surfaces weight bearing areas and a non-weight bearing arch shaped midportion (46) extending between the weight bearing areas, wherein the midportion is formed with a coiled spring which is compressed to absorb and expanded to return vertical load during use of the foot keel in a prosthetic foot (see Figs. 3 and 6).

Regarding claim 2, see Fig. 6 disclosing the arch shaped midportion that coiled downwardly and anteriorly (see element 50 going down).

Art Unit: 3738

Claims 1-6, 8, 10-12, 14, 20-26 are rejected under 35 U.S.C. 102(e) as being anticipated by Jang et al US Patent 6,514,293 B1.

Jang et al discloses a prosthetic foot (100) having a posterior (110) and anterior (113) plantar surfaces weight bearing areas and a non-weight bearing arch shaped midportion (106-109) extending between the weight bearing areas, wherein the midportion is formed with a coiled spring which is compressed to absorb and expanded to return vertical load during use of the foot keel in a prosthetic foot (see Fig. 4).

Claims 14, 15, 19-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Atkinson et al US Patent 2002/0087216 A1.

Atkinson et al discloses a prosthetic foot (354) having a posterior (358) and anterior (356) plantar surfaces weight bearing areas and a non-weight bearing arch shaped midportion (see arch of 354) extending between the weight bearing areas, wherein the midportion is formed with a coiled spring which is compressed to absorb and expanded to return vertical load during use of the foot keel in a prosthetic foot (see Fig. 10B).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Allen et al US Patent 5,653,767.

Art Unit: 3738

Allen et al discloses the invention substantially as claimed. However, Allen et al does not disclose an expansion joint hole and an expansion hole.

At the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to make an expansion hole and an expansion joint hole because Applicant has not disclosed that having an expansion joint hole and an expansion hole provides an advantage, is used for a particular purpose, or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with openings between each elongated members 20 & 22 because the openings between the elongated members 22 and 20 will improve biplanar motion capabilities.

Therefore, it would have been an obvious matter of design choice to modify the Allen et al reference to obtain the invention as specified in claim 13.

#### ***Allowable Subject Matter***

Claims 16, 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alvin J. Stewart whose telephone number is 571-272-4760. The examiner can normally be reached on Monday-Friday 7:00AM-5:30PM(1 Friday B-week off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on 571-272-4754. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
